SUMMARY

UX/UI Engineer with a degree in Applied Computer Science (Second-Class Honors), experienced in working on scalable enterprise solutions, and government sectors. I innovate, design, and develop seamless, user-centered experiences that align business goals with user needs. I'm very passionate about finding out ways to better deliver and improve efficiency whether it be by integrating AI into design, or working with different technologies to accelerate a faster and higher quality delivery. I create with clarity, lead with intent, and aim for lasting impact.

AWARDS

- First Place, Impact Accelerator Program** 2024
Misk Foundation
- AI Champion** 07/2026
Lean Business Services

PROFESSIONAL EXPERIENCE

- Software Engineer** 04/2026 – Present
Lean Business Services
 - Worked on analyzing, designing, developing a full fledged data-based complex end-of-year gamified mobile app product experience.
 - Worked on several complex innovative one-of-a-kind experiences and features for mobile apps from research to design, development, and iterated based on real user feedback.
 - Lead and developed the Lean.sa corporate website project from technical architecture, and ux research to ux design and development, to CMS integration and SEO and accessibility optimization then to usability testing and QA, and continuous operation at a pace of bi-weekly releases.
- UX/UI Designer** 08/2024 – 04/2026
Lean Business Services
 - Designed key Lean App features from concept to delivery, including flows, A/B testing, front-end development and dev handoff.
 - Led UX research and redesign of Raqem through intensive interviews, testing, surveys, and other studies.
 - Created a custom card sorting tool from scratch to support internal research.
 - Designed and developed a bunch of different applets and workflows to improve and speed up different functions across different projects, from UI wireframing, to full fledged Agentic-AI automations.
 - Researched, tested, and introduced different agile behavior analytics solutions to improve team outcomes and product insight.
 - Worked on multiple different projects that serve all kinds of clients from consumer-facing apps like Sehhaty, to specialized one-of-a-kind innovative projects like Lean's AI Employees.
 - Supported 500+ UX/UI, Product, and engineering tasks and participated in 10+ field research studies across different projects, including key roles in most of Lean's products.
- UX/UI Designer** 06/2024 – 08/2024
Saudi Federation for Cybersecurity, Programming and Drones
 - Contributed to UX/UI design for CoderHub and Satr platforms during agile sprints.
 - Designed new features including a 90s-themed UI challenge and collaborative team environment.
 - Conducted research, usability testing, and cross-functional reviews with product and dev teams.
- Consultant** 2023 – Present
Hemaya

EDUCATION

- Bachelor's Degree in Applied Computer Science** 2019 – 2024
King Saud University

COURSES

UX Design (Accelerated) Program <i>Misk Foundation</i>	2023
PMI Agile Certified Practitioner (PMI-ACP) <i>Project Management Institute (PMI)</i>	05/2026

SKILLS

Core skills

- User-Centered Design
- Agile UX Research & Insight Analysis
- Wireframing & Prototyping
- Usability Testing
- Front-end Handoff Support
- AI-Driven UX Workflows
- Data-Driven Design Decisions

Collaboration & Execution

- Cross-Team Communication
- Agile & Iterative Workflows
- Knowledge Sharing & Team Enablement
- Different Stakeholder Alignment
- Strategic Problem Solving
- Time & Priority Management
